

TENANT TIPS

October 2013

Being connected can make all the difference.

In the past, being connected was all about who you know. While that is still true, staying connected has become even more reliant on technology. Having the wrong Internet connection can cripple your business. The right IT consultant is one connection not to be without. Here are just a few tenant tips:

1. Understand your bandwidth needs
2. Know the difference between DSL and FiOS
3. Request a proper site survey and avoid Comcast or Verizon service maps
4. Explore all your options if Comcast or FiOS is not available

Says, Anthony Mongeluzo, president, "At PCS Business Services, our IT experts help companies address these tips and more. Given all of the products and packages out there, it can be confusing. For more information or to schedule a consultation, let us help by calling (856) 596-4446."
