

TENANT TIPS

September 2013

DON'T GET HACKED!

Cyber thieves don't discriminate - they can attack companies of any size and in any industry. Hackers typically follow a path of least resistance so step one is to appear protected and continuously evaluate security plans as technology changes. Here are some helpful tips:

1. Train employees in security principles
2. Provide firewall security for your Internet connection
3. Make backup copies of important business data and information
4. Secure your Wi-Fi networks
5. Use passwords and authentication

office  **systematics, llc**
effective system solutions for the small business ®

According to Clark Milloti of Office Systematics, "The biggest security issue stems from company employees accessing risky sites, social media and scams to good to be true.

Smart small businesses create a security practices policy."
